[30 years of experience

antares Informations-Systeme GmbH is a medium-sized, independent company specialising in professional software.

Since our formation in 1994, we have been developing and marketing strategic information systems used by more than 300 companies and over 45,000 users for daily decision making.

Our products are characterised by state-of-the-art technology, innovation and user-optimised solutions. We focus on passion, reliability and professionalism when dealing with our customers and partners.

Our many years of expertise in the areas of Analysis, Planning and Corporate Management, Governance, Risk and Compliance form the basis for the creation and expansion of our advanced antares software solutions.

Almost 30 years
of expertise

300+
customers

3.000+
projects

45.000+
users

[Close to the customer

Thanks to our **industry experience and technological expertise**, we are able to adapt our customers' business intelligence plans precisely to their individual requirements.

Providing excellent **support** is our priority. In order to ensure this, we constantly develop our established software solutions, undertake professional project management and also offer comprehensive services ranging from training sessions and webinars to coaching.

Our **goal** is to create a secure, user-friendly information base for our customers so that they can make conscious, reliable decisions.

[This is how we can support you

Competent analysis, consulting and implementation

Our specialists accompany your BI project from analysis and consulting to implementation. We develop sophisticated and flexible modules that are seamlessly integrated into your IT environment.

Organize trainings

We offer basic training courses on all specialist topics as well as specific advanced and expert training courses. The offer includes sessions on all software solutions as well as on the following topics: Longview Analytics (formerly arcplan Edge, arcplan Enterprise), and Microsoft SQL server.

Adjust information structures

Are you planning to reduce costs by standardizing your software system? Are you striving for flexibility and compatibility of your IT infrastructure? Whatever goal you have - we will be happy to support you!

Arrange coachings

The intuitive interface structure and modern web-based design allow easy operation. Self-explanatory cockpit views and graphics facilitate daily handling and ensure fast results.

Supervise individual projects

Are you looking for support for your current project or a takeover and realization of a completely new project? You can rely on the know-how of our experienced specialists.

Organize webinars

We usually offer 6-10 webinars a year on specific topics, so you can always stay up to date. Feel free to contact us and find out about upcoming webinars.

Create prototypes

Does the result meet your requirements? Involve users in the development of the future BI solution at an early stage. Benefit from our know-how in the creation of prototypes.

Host seminars

With seminars, we pass on our know-how from numerous BI projects to you. During the seminars you will learn, among other things, which key figures you should ideally use in a production cube, how the key figures are calculated and what statements can be made with them.

[Your benefits at a glance

- **Decision security:** Avoid having to make your decisions without a solid data basis. Make decisions safely and with foresight, based on all relevant factors.
- **Fast results:** Flat hierarchies guarantee fast processing, competent consulting and a professional realization of your wishes at the highest level. Our established software solutions are ready for you to use in 5-10 days.
- **Generate knowledge:** Integrate data, analyze it, and thereby generate knowledge. Initiate, plan and control measures consciously - in a simple and user-friendly software solution.
- **Make success plannable:** Qualified data analyses, sound planning, impact forecasts and scenario quantification make success tangible for you.
- **Minimize bad decisions:** The application of scenario methods and simulations help you make correct forecasts and avoid wrong decisions.
- **Maximize leadership quality:** Make confident decisions through qualified decision preparation, modeling and predictive controlling.
- **Avoid complex processes:** Standardized and transparent data interfaces ensure quality and reduce your effort.
- **Act with foresight:** Respond quickly to the market environment with ad hoc analyses and the integration of internal company and external market data.

[Working with us

Phase 1: Getting to know each other

We attach great importance to personal proximity to our interested parties and customers, because this is how a basis of trust can develop. Due to our flat hierarchy, your personal contact person is immediately available and will address you regarding your project.

We establish personal contact within the framework of a live presentation, web session or telephone conference, depending on how it suits you best. We will be happy to present our company and our solutions and services to you. You are always at the centre of our discussions. We want to get to know you, your company and your plans. We have an open ear for every question, suggestion or idea. In this first phase, we advise you without obligation and free of charge in finding a solution.

Phase 2: Analysis

What does your world look like today and what do you want it to look like tomorrow?

What is feasible and where are the limits?

What is the service and what benefit is to be created?

What goal is to be achieved and when, what results do you expect?

What are the requirements for the software solution?

What is the starting position, where are the stumbling blocks?

Phase 3: Strategy

Within the framework of the comparison of ACTUAL and TARGET, we can derive and accompany direct measures together with you. We look for the answer to the questions: How can we fulfil your expectations, from the start to the finish? Which solution do we achieve with which software? What are the basic conditions for this and which path do we take with you?

Phase 4: Implementation

Now that we know which software solution is best for you, we take care of the implementation in your company and in your processes - quickly, reliably and always with the goal in mind.

Our software solutions are web-based and are integrated into your existing IT environment without any data loss.

Phase 5: Service

In every project, the human being still comes first for us! Users not only want to see practical added value, they also want to be completely satisfied with the solution. That is why we offer coordinated services to achieve this together with you and lead your project to success.

Support: Get to know the software! In addition to live presentations, potential users can put the software through its paces in the test phase. For this purpose, we also offer online or PDF manuals with step-by-step instructions for our solutions. Our support is guaranteed to be available for you via helpdesk or hotline.

Learning: We offer training, workshops, webinars, seminars or coaching not only on our software solutions, but also on other preferred IT topics. You can contact us at any time to arrange an appointment.

Expansion: As time goes by, your business, your demands, processes and goals change. Our solutions move with the times! They are always tested for quality and offer state-of-the-art technologies. We are a competent partner for expansion requirements. Our applications can be expanded modularly and individually at any time.

Consulting: Experience, know-how, practised customer proximity and expert knowledge are the basis of our service and consulting. From data to information to knowledge is the path. Together with you. For you.

[Strong products need strong partners

We cooperate with well-known technology partners to get the most out of our antares BI software solutions for our customers. This forms the basis for technologically advanced, modern and successful product development.

Anbindung von:

[Over 300 companies benefit from our solutions

Satisfied customers are the result of our bespoke software solutions. We support customers in a wide variety of industries and can prove this with our references.

[What our customers say

„It took us many hours with MS-Excel for the graphical representation of all control-relevant data. The implementation with the antares solutions, however, is fast and easy.“

Alfred Kessen
Head of Materials Management & Logistics
[Wernsing Feinkost GmbH](#)

„antares RiMIS® convinced not only with its comfortable and individual reporting, but also with the intuitive user interface. The application could be learned very quickly, so that no gaps in the work process occurred.“

Svenja Olejak
GF Corporate Controlling
BA & F / Risk Management
[LANXESS AG](#)

„The direct line to the software manufacturer - without much waiting time - confirmed our decision. The implementation is one aspect, the good support the other.“

Rouven Walter
Head of Risk Management & Rating
[Intersport Deutschland eG](#)

„With the flexibility and practicality of antares analyzer, our sales controlling has been taken to an even higher quality level.“

Jörg Horn
Authorized officer & commercial manager
[Kiesel Bauchemie](#)

[Introducing ourselves

What we do

We are a medium-sized, independent company specializing in professional software. Since our foundation in 1994 we have been developing and marketing strategic information systems.

Many years of expertise in the areas of analysis, planning and corporate management as well as governance, risk and compliance are guarantors for the development and expansion of the advanced antares software solutions.

Who we are

State-of-the-art technology, innovation and user-optimized solutions characterize our products. Passion, reliability and professionalism are the guidelines in dealing with our customers and partners. Competent and reliable support is our top priority. To ensure this, we work consistently on the further development of our established software solutions, provide professional project management and also offer comprehensive services - from training and webinars to coaching.

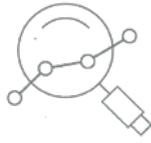

What we offer

We now count more than 300 companies of all industries and sizes among our customers, including well-known companies from the industrial, retail and service sectors. They all benefit from an experienced BI company with flat hierarchies, professional partnership and customer proximity.

What is our goal

Our goal is to provide our customers with a secure, user-friendly information base so that informed and confident decisions can be made.

[30 years of experience in the development of business Intelligence software solutions

Analyze. Plan. Control.

Integrate your data and make knowledge work for you. Gain important insights to make confident and profound decisions.

Governance. Risk. Compliance.

With our holistic risk and opportunity management software, you systematically identify, analyze, assess, monitor and control risks to seize business opportunities.

Individual BI software

We've been implementing BI software solutions for 30 years, helping you make better decisions across your business. Perfectly tailored to your needs and processes.

Software consulting

We offer a comprehensive portfolio of services, ranging from the compilation of your software requirements, implementation and accompanying user training to maintenance after completion of the project.
